

Notification of Department of Agriculture  
Re: Conditions for Import of Potatoes for Consumption from the Netherlands  
B.E. 2552

-----

The Department of Agriculture has completed pest risk analysis for commercial importation of potatoes for consumption from the Netherlands into Thailand. By virtue of the provisions of Section 8 and Section 10 of the Plant Quarantine Act B.E. 2507 (1964) amended by the Plant Quarantine Act (No. 3) B.E. 2551 (2008) with particular provisions that may restrict the right and freedom of any person in which Section 29 together with Section 32, Section 33, Section 41 and Section 43 of the Constitution of the Kingdom of Thailand permits by virtue of the law. The Director-General of Department of Agriculture through the recommendation of the Plant Quarantine Committee, hereby announces the conditions that have to be met in order to import potatoes for consumption purpose from the Netherland into Thailand as follows:

**1. Plant species**

Tuber of potato, *Solanum tuberosum*

**2. Quarantine pests of concern**

A list of quarantine pests of current concern to Thailand for potatoes for consumption and associated soil from the Netherlands is given in Appendix.

**3. Responsible organizations**

3.1 Thailand: Department of Agriculture  
(hereinafter referred to as DOA)

3.2 The Netherlands: Ministry of Agriculture, Nature and Food Quality,  
Plant Protection Service  
(hereinafter referred to as MANFQ-PPS)

**4. Import permit**

Import permit issued by DOA is required.

## **5. Means of conveyance**

Potatoes shall be imported from a port in the Netherlands to a designated port in Thailand by ship-cargo or air cargo. In case of ship cargo, potatoes can be exported from ports in Belgium and Germany.

## **6. Production areas**

6.1 Some areas in the Netherlands have been found to be infested with potato cyst nematode (pale cyst nematode, *Globodera pallida* and golden nematode, *Globodera rostochiensis*).

6.2 Potatoes produced in all production areas in the Netherlands are permitted to import into Thailand except potatoes produced in the following areas are prohibited to import into Thailand.

7.2.1 Potatoes produced in potato cyst nematode regulated areas.

7.2.2 Potatoes produced in land which as a result of soil test has been found to be contaminated with potato cyst nematode.

## **7. Phytosanitary import requirements**

7.1 Potatoes imported for consumption shall be free of quarantine pests specified in this Notification.

7.2 It is mandatory that land on which the potatoes were grown must be subjected to an official soil test pre-planting or pre-harvest for the presence of potato cyst nematode. Only potatoes grown in fields free of potato cyst nematode are permitted to import into Thailand. The certification for the presence of potato cyst nematode in potato field shall be carried out according to the agreed upon protocol. In addition, the samples of soil shall be analyzed by NAK's laboratory.

7.3 The soil testing protocol for potato cyst nematodes shall be based on Council Directive 2007/33/EC of 11 June 2007 on the control of potato cyst nematodes and repealing Directive 69/465/EEC.

7.4 To mitigate the risk associated with nematodes and the presence of infected tubers, the import of potatoes for consumption must be washed so as to be practically free of visible soil.

## **8. Phytosanitary Certification**

8.1 A Phytosanitary Certificate must accompany with each consignment of potatoes from the Netherlands.

8.2 A Phytosanitary Certificate shall bear the following additional declaration.

*“The potatoes in this consignment were produced in the Netherlands in accordance with the conditions governing entry of potatoes for consumption to Thailand and inspected and found to be free of quarantine pests”.*

and

*“The potatoes in this consignment have been washed.”*

- 8.3 Container number (for sea freight only) must be recorded on the Phytosanitary Certificate.

**9. Audit of export procedures**

- 9.1 The export of potatoes for processing from the Netherlands to Thailand shall only be initiated after the DOA has already audited export certification procedures. The costs of such audits must be borne by the Netherlands.
- 9.2 In the event of a suspension of import, DOA may audit export certification procedures in the Netherlands prior to a decision being taken on resumption of import. Where DOA has determined that such audits are necessary, the costs of these audits must be borne by the Netherlands.

Effective on this date henceforth.

Issued on 13 November B.E. 2552 (2009)

Mr. Somchai Charnnarongkul

Director-General  
Department of Agriculture

**Appendix**

List of quarantine pests of potatoes for consumption and associated soil  
 from the Netherlands  
 attached to the Notification of Department of Agriculture  
 Re: Conditions for Import of Potatoes for Consumption from the Netherlands  
 B.E. 2552 (2009)

Scientific name	Common name
Plant Pathogens	
Nematodes	
<i>Ditylenchus destructor</i>	potato rot nematode
<i>Ditylenchus dipsaci</i> (potato race)	stem and bulb nematode
<i>Globodera pallida</i>	pale cyst nematode
<i>Globodera rostochiensis</i>	golden nematode
<i>Meloidogyne chitwoodi</i>	Columbia root knot nematode
<i>Meloidogyne fallax</i>	false Columbia root-knot nematode
