What can be funded: All research areas can be funded. MSCA Fellows come from a wide variety of disciplines – from physics to linguistics, and from health-sciences to mathematical modelling.

What the funding covers: The grant provides a generous allowance to cover living, travel and family costs. In addition, the EU contributes to the training, networking and research costs of the fellow, as well as to the management and indirect costs of the project.

Application and evaluation: Applicants submit a research proposal, including their CV. The proposal is written jointly with the applicant's chosen host organisation(s).

What is the timeline: The 2020 Call for Application will open on 8 April 2020 with a deadline of 9 September 2020.
